ABSTRACT

A polymer jacket tube includes a conductor bar 4 which has a conductor insertion hole 4a at its lower end part, a rigid insulation sleeve around 2 ~~which is provided at the~~ outer periphery of the conductor bar 4, and a polymer covering 3 on ~~which is provided at the~~ outer periphery of the insulation sleeve 2. The insulation sleeve 2 includes a large-diameter insulation sleeve 2a ~~which is provided at the~~ lower, outer peripheral ~~part of the lower~~ portion of the conductor bar 4, and a small-diameter insulation sleeve surrounding 2b ~~which is provided at the outer peripheral part of the~~ portion of the conductor bar 4 except for the distal end ~~part thereof~~. An, ~~and an~~ embedded metal fitting 4 for electrical stress relief is buried in the continuous portion of the large-diameter insulation sleeve 2a and the small-diameter insulation sleeve 2b. ~~Besides, a~~ A cone-shaped reception port 5 ~~which~~ receives the stress cone 42 of a cable terminal 44 and is located ~~provided~~ at the lower end ~~part~~ of the large-diameter insulation sleeve 2a, ~~and this,~~ which reception port 5 is held in communication with the conductor insertion hole 4a of the conductor 4.
